

This exercise augments classroom discussion on writing for different kinds of intended readers.

1. List the members of your group below. Underline your name.
2. Pick one key aspect of your project for this exercise, and identify it briefly.
3. Describe, in approximately 100 words, your selection from Question 2 for readers who are familiar with computer science at the CS-sophomore level.

4. Repeat Question 3 for a general readership of people who have no computer science training.

5. Repeat Question 3 for experts in the topic of your project.

6. Critique of the above:
