

This exercise augments classroom discussion on concise descriptions of projects for different readerships.

1. List the members of your group below. Underline your name.

2. Summarize the main technical aspects of your project proposal in 100–150 words. Assume your readers are computer scientists. Be sure to clearly describe the main technical problem addressed by your work.

3. Critique of the above:

4. Repeat Question 2 for a nonspecialist readership.

5. Critique of the above:
