1. List the members of your group below. Underline your name.

2. Use a suitable example of a _makefile_ to explain the essential aspects of _make_. Pay special attention to the length and complexity of the example, its layout, and its connection, visual or other, to the explanation.

3. Critique by:

4. List three strengths and three weaknesses of the example from the GNU make docs. Describe at least one concrete and significant improvement.

5. Briefly summarize your efforts in finding a Capstone project advisor.
